

VELAQUA WATER ENRICHMENT SYSTEM

ONE SYSTEM - 7 AMAZING FUNCTIONS

1. FILTERS

Ceramic filter rated at 0.2 - 0.9 microns provides the first line of defense as it traps contaminants, keeping bacteria and spores from entering the system

2. MICRO CLUSTERS

Our proprietary Ion-Infused Ceramic Disc ionizes water as it passes through. Ionization breaks tap water molecules from 12 -14 down to 4-6 molecules

3. ENERGIZES

In addition to our energy-infused ceramic disc, we've added natural minerals with bio-energy health giving properties such as Tourmaline and Far-Infrared producing bio-energized water

4. MINERALIZES

The top chamber contains health giving minerals such as Tourmaline, Far-Infrared and Zeolite. When water passes through, it absorbs the myriad of health giving minerals contained within these three natural earth minerals

5. ALKALIZES

Among other minerals, the bottom chamber contains our proprietary natural mineral to increase the alkalinity level in your tap water. Alkaline water created from natural sources have been known to yield various health benefits

6. IONIZES

Another proprietary mineral in the bottom chamber is specifically used to naturally increase the level of Oxidation Reduction Potential (ORP) in water which is also known to be beneficial when consumed

7. PURIFIES Organic Coconut Fiber Carbon infused with Colloidal Silver provides the last water purification process in the bottom chamber before water flows out to the storage tank and consumed. Carbon is widely used worldwide to purify water and Colloidal Silver is a known and effective antiseptic
